## Hydrophilic Coated Meatal Dilators

Intended specifically for the dilatation of meatal strictures in males. Now available in Tapered Tip and Standard Bullet Tip options. 12cm in length.

**NEW**  
Tapered  
Tip

### Safe and Reliable Hydrophilic Coating

Activated in 15-30 seconds, remains smooth and highly lubricated from insertion to removal.

Standard  
Bullet  
Tip

Non-coated  
grip zone.

### Product Information Label

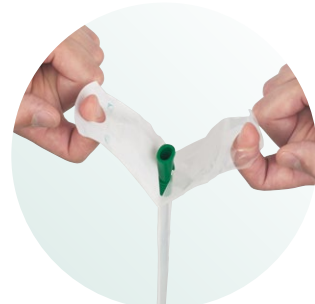

Self-adhesive product information label.

### Self-Adhesive Pad

Assists preparation. Enables Meatal Dilator packaging to be fixed to a convenient surface.

### Easy Access Finger Holes

Require minimum effort when opening Meatal Dilator packaging. Ideal for those with limited dexterity.
