

Colomate

Colomate 1-Piece Closed Pouches

The **Colomate 1-Piece Closed Pouch** has been designed with comfort and flexibility in mind. The pouches are available in various shapes and sizes with the choice of cut to fit or pre-cut skin barriers.

The benefits to you...

Skin Barrier

- Traditionally formulated, slim, flexible, skin friendly, hydrocolloid adhesive skin barrier that effectively absorbs moisture, maintaining the skin in optimum condition.
- Available in various shapes that offer maximum security in areas where creases and skin folds are likely to occur around the stoma.

Effective Bar Filter

- High capacity 32mm bar filter.
- Helps prevent ballooning and pancaking, contributing to improved pouch wear time.

Filter Protection

- An additional layer of film, the 'raincoat', separates the filter from the stoma, providing optimum performance.
- Filter covers are provided for additional protection and security, as directed by your Stoma Care Nurse.

Pouch Cover

- Body side covering is made of a soft, non-woven material that helps to prevent skin soreness by absorbing moisture from the skin.
- Available in beige for discretion, or in a 'needle pin' split cover to assist with pouch application and observation of the stoma.

This product range is latex free.

Available on NHS prescription.
