

## Varimate Resist Washers

The **Varimate Resist Washers** are a unique formulation that provides flexibility and helps to improve pouch wear time.

### The benefits to you...

- Designed to help improve pouch wear time, the washers can be folded and used as a filler to help prevent unwanted leaks and potential skin breakdown.
- As the name suggests, the washers are resistant to the effects of urine as well as the aggressive output from faecal stomas.
- The mouldable washer can be increased in size, and will remain in the desired shape without breaking.
- The washers remain sticky when rolled and stretched repeatedly, and also when wet.

**Available on NHS prescription.**
